LinkedIn: [\[Profile\]](#)

PROFESSIONAL PROFILE

Final-year Civil Engineering (Honours) student at the University of Technology Sydney with approximately two and a half years of practical experience in structural and façade consultancy. Experienced in drawing reviews, structural assessments, façade and weatherproofing reviews, site inspections, water testing, technical reporting and project coordination. Brings a practical construction background, strong attention to detail and an understanding that engineering solutions must be safe, compliant, buildable and clearly communicated.

EDUCATION

Bachelor of Engineering (Honours) – Civil Engineering, Structures Stream

Final Year

University of Technology Sydney (UTS)

ENGINEERING EXPERIENCE

Junior Structural / Façade Engineer | Structural & Façade

2024 – Present

Consultancy

- Assist with structural assessments and façade engineering reviews across residential and commercial building projects.
- Review architectural and structural drawings, shop drawings, product data and test reports against project requirements, the NCC and relevant Australian Standards.
- Undertake façade and weatherproofing reviews, site inspections, water testing and defect assessments, then document findings and required rectification.
- Prepare technical reports, design mark-ups, calculation packages and professional correspondence for review by senior engineers.
- Coordinate with architects, builders, façade contractors, suppliers and other consultants to resolve design, compliance and constructability issues.
- Develop practical knowledge of glazing, aluminium framing, façade fixings, balustrades, cladding, waterproofing and building-envelope performance.

PREVIOUS EXPERIENCE

Leading Hand | Catalyst Construction [add dates]

- Took on increasing responsibility for coordinating day-to-day building activities and helping works progress safely and efficiently.
- Worked from DA/CC documentation and engineering drawings, strengthening practical understanding of sequencing, tolerances and buildability.
- Developed a detail-oriented approach to identifying site issues, communicating them early and helping coordinate practical solutions.

Online Team Leader | Woolworths Parramatta [add dates]

- Supervised team members and monitored compliance with procedures, quality expectations and daily performance targets.
- Communicated priorities and KPIs, supported new team members and helped improve workflows during periods of changing demand.
- Built leadership, accountability and time-management skills that now transfer directly into project-based engineering work.

TECHNICAL SKILLS

Engineering	Structural assessment; façade engineering; weatherproofing; glazing; aluminium members and connections; site inspections; water testing; defect review
Codes & Standards	NCC; working familiarity with Australian Standards used in structural and façade design, including AS 1288 and AS/NZS 1170 series
Documentation	Technical reports; calculations; drawing mark-ups; shop-drawing reviews; inspection records; product and test-report reviews
Software	Bluebeam Revu; Microsoft Excel and Office; WUFI exposure; engineering calculation and document-control workflows

SELECTED ENGINEERING EXPOSURE

- Façade weatherproofing reviews involving seal continuity, exposed fixings, sill drainage, window interfaces and rectification following water testing.
- Structural and serviceability checks for glazing, aluminium members, balustrades, privacy screens and connection details under project loading requirements.
- Review of shop drawings, test reports and product documentation to confirm that the proposed system matches the design intent and relevant compliance requirements.

CAREER INTERESTS

Structural engineering • Façade and building-envelope engineering • Building engineering • Project roles that combine design review with site involvement

CORE STRENGTHS

Practical problem-solving • Attention to detail • Technical communication • Professional accountability • Stakeholder coordination • Self-directed learning
